PROJECTS AND TRAINING

- **Institutional training** in Core Java at Solitaire Infosys Inc., Patiala (June 2018). Project Name: **Face Mystery**
Duration: 6 weeks
Tools/Technologies Language: Java, NetBeans, MYSQL
Project Description: The aim of this project is that the user can check his\her guessing ability. It is a game where faces of celebrities are divided into parts and user has to guess the celebrity name by looking at his\her different face parts.
- Project Name: **Data Leakage Detection**
Duration: 3 months
Tools/ Technologies Language: Java, NetBeans, MYSQL
Project Description: The goal of this project is to detect when the distributor's sensitive data has been leaked by agents, and if possible to identify the agent that leaked the data. A data distributor has given sensitive data to a set of supposedly trusted agents (third parties). The distributor must assess the likelihood that the leaked data came from one or more agents, as opposed to having been independently gathered by other means.

- Project Name: **Training and Placement Cell for University**

Duration: 2 months

Tools/ Technologies Language: JSP, HTML, CSS

Project Description: This project is aimed at developing an online application for the Training and Placement Dept. of the college. This system can be used as an application for the TPO of the college to manage the student information with regards to placement. Students logging should be able to upload their information in the form of a CV. Visitors/ Company representatives logging in may also access/search any information put up by Students.
